Windsor Industries founded in 1970 is a full line manufacturer of carpet & hard floor building maintenance equipment. Focused on designing & building equipment. Line Includes: Carpet Chemicals, Automatic Scrubbers, Floor Burnishers, Floor Polishers. Carpet Extractors & Vacuums. They also provide all parts and accessories in support of their product lines.

Jerry Smith, purchasing manager was seeking a non hazardous protective packaging material for his parts and accessories department. “Our employees were not happy with the chemical foam products we were using...so we took a look at **ExpandOS**....What we got was an incredibly versatile packaging system...by versatile I mean both the mobility of being able to move the **Expander** around our facility whenever we need to as well as the variety of products that we can use the **ExpandOS** with.”

“We only use **ExpandOS** on our damageable products”...said Jerry...”we do not use it as a dunnage material.... I am very happy with this system...the **Expander** is a very easy machine to use and replenish.... I enjoy watching the **Expander** run flawlessly.”
